On April 21, 2009, President Barack Obama signed the Edward M. Kennedy Serve America Act (SAA). The SAA reauthorizes and expands national service programs administered by the Corporation for National and Community Service, a federal agency created in 1993. This Notice of Federal Funding Opportunity is part of the process of implementing this Act.

I. Funding Opportunity Description

What is the purpose of Learn and Serve America Summer of Service Grants?

The passage of the Edward M. Kennedy Serve America Act provided Learn and Serve America with the authority to support Innovative and Community-Based Service-Learning programs, including Summer of Service. These grants will support collaborative efforts to establish or implement service-learning programs during the summer months. Programs will engage middle school students (students who will be enrolled in grades 6 through 9 in the school year following the end of the summer) in community-based service-learning projects that are intensive, structured, supervised, and designed to produce identifiable improvements to the community. This opportunity should provide youth, particularly those from disadvantaged circumstances, with service-learning experiences that will motivate them to become more civically engaged and aspire to obtain higher education. Program participants must complete at least 100 hours of service within the summer program. For this competition, service activities must address environmental and/or disaster preparedness issues relevant to the community served.

What are the goals for this funding?

The goals of this competition are to:

- Increase student civic, academic and leadership skills;
- Provide disadvantaged youth with service-learning experiences that motivate them to become more civically engaged and aspire to obtain higher education;
- Conduct service-learning activities that address environmental issues (e.g., energy conservation) and/or disaster preparedness;
- Strengthen community partnerships that support youth development and community problem solving; and
- Encourage schools to develop supports for service-learning during the summer so they can continue these programs during the school year.

The successful applicant will serve as the fiscal sponsor for the grant and will implement program requirements either directly or through support to multiple operating sites.

What is the background of Learn and Serve America?

For over fifteen years, the Corporation for National and Community Service—through its Senior Corps, AmeriCorps, and Learn and Serve America programs—has mobilized a new generation of engaged citizens. This year, more than 1.8 million individuals of all ages and backgrounds will serve through these programs. They will help thousands of national and community non-profit organizations, faith-based groups, schools, and local agencies meet local needs.

Learn and Serve America grants provide support to organizations that involve young people, particularly those from disadvantaged circumstances, in service-learning projects that simultaneously support student development and meet community needs. Summer of Service grants will help keep middle school students productively involved in the community and engaged in learning during the summer months.

What is service-learning?

The National and Community Service Act defines service-learning as an educational method that:

- is conducted in and meets the needs of a community;
- is coordinated with an elementary school, secondary school, institution of higher education, or community service program, and with the community; and
- helps foster civic responsibility; and that
- is integrated into and enhances the academic curriculum of the students, or the educational components of the community service program in which the participants are enrolled; and
- provides structured time for the students or participants to reflect on the service experience.

II. Award Information

How much funding is available?

Subject to the availability of appropriations for fiscal year 2010, the Corporation for National and Community Service (the Corporation) announces the anticipated availability of approximately \$1,000,000 to award approximately 5 to 7 new Learn and Serve America Summer of Service grants.

What are the requirements related to this award?

Project/Award Period

The Corporation generally makes grant awards for three years, with funding in annual increments. Grantees will be eligible for continuation funding in the second and third years contingent on the availability of appropriations, compliance, and satisfactory performance.

Program Size and Structure

Each successful applicant will propose to engage approximately 100 to 500 youth. Applicants may describe a structure appropriate to the proposed plan. For example, the proposed program may be a stand-alone summer program or an extension of school-year service-learning projects.

Implementation may occur at a single location or multiple sites. The program narrative must describe the program size and structure and how it will be implemented and managed effectively.

Education Awards

Students who complete at least 100 hours of service in an approved summer of service position, as certified through a process determined by the Corporation, are eligible for a summer of service educational award of \$500. These funds are not included in the grant award and are provided directly to the student through the National Service Trust. The student may use the award to pay for educational expenses at qualified institutions of higher education. Participants have up to ten years after the term of service has ended to use the award.

Operating Costs per Participant

The maximum amount an applicant can request from the Corporation for operating costs (not including Education Awards) is \$500 per program participant. (For example: if you estimate that you will enroll 250 student participants, your budget may not exceed \$125,000.)

Participant Enrollment Requirements

We expect grantees to enroll the full number of participants included in their grant awards. Funding may be affected for applicants that do not fully enroll the expected number of participants.

Participant Retention Requirements

We expect grantees to pursue the highest retention rate possible. Funding may be affected for applicants that do not fully retain participants.

III. Eligibility Information

Who is eligible for this funding?

Eligible applicants include State Education Agencies, State Commissions, US Territories, Indian tribes, institutions of higher education, public or private nonprofit organizations (including faith-based organizations), public or private elementary or secondary schools, local educational agencies, or a consortium of such entities.

Grantees must have experience managing a summer youth program that accommodates at least 100 youth at a time, and must have access to existing infrastructure to support recruitment, enrollment, training and supervision for the youth, and tracking of volunteer hours. ***Please Refer to Section IV for Other Submission Requirements.***

Are there matching requirements for these grants?

No, there are no matching requirements for this grant. However, the average cost per program participant is likely to exceed the amount applicants are allowed to request. As a result, it is expected that applicants will have existing capacity and strong local support to implement the program.

Who is eligible to participate?

Participants must be youth who will be enrolled in any of grades 6 through 9 in the school year following the end of the summer during which they participate.

What is a DUNS number and is it required?

The DUNS number is used as a Universal Identifier. Applications must include a Dun and Bradstreet Data Universal Numbering System (DUNS) number on the Standard Form 424. The DUNS number is an identifier that helps the federal government improve statistical reports on federal grants and cooperative agreements. The DUNS number does not replace your Employer Identification Number. DUNS numbers may be obtained at no cost by calling the DUNS number request line at (866) 705-5711 or by applying online at www.dnb.com.

The website indicates a 24-hour email turnaround time on requests for DUNS numbers; however, we suggest registering at least 30 days in advance of the application due date. Expedited DUNS numbers may be obtained by telephone at a cost of \$99 by calling the DUNS number request line. Applications without DUNS numbers or with invalid DUNS numbers will be rejected.

We recommend that you review the elements of successful programs described in Section V as you draft your responses.

1. Program Design

Describe your approach to developing and implementing a successful Summer of Service program for middle school youth, particularly those from disadvantaged circumstances. Applicants should include a plan for reaching youth from disadvantaged circumstances and engaging them in service-learning during the summer months using a cross-sector, collaborative approach in a concentrated geographic area.

The program narrative must describe the program size and structure and how it will be implemented and managed effectively. Your Program Design narrative should include:

Goals and Objectives – What are the proposed project’s goals and objectives? What are the expected outcomes and how will you measure them? You should describe the goals and objectives for the following three areas:

- **Impacts on participants** – Who is the target population? How many youth do you plan to recruit? How will those youth, especially those from disadvantaged circumstances, be recruited and retained? What is the measurable impact on youth participants? (e.g., increased civic, academic and leadership skills)
- **Impacts on the community** What is the connection between the community need(s) you describe and the approach you are using? What demonstrable impact will youth service activities have on the identified community need(s) that are related to environmental issues (e.g., energy conservation) and/or disaster preparedness?
- **Impacts on the local infrastructure to support service-learning** – How does the program build community-wide support through additional volunteers and resources? How does the program promote active citizen engagement in community problem solving along with the youth engaged in the program? What supports will be put in place to encourage the sustainability of service-learning activities?

(Successful applicants will be asked to develop performance measures using this information following award approval.)

Community Resources – How will you use existing organizational capacity, community resources, partnerships, and volunteers to implement your approach and ensure its success? How will the program ensure appropriate training and supervision of participants?

Note: Programs that receive assistance under the national service laws must consult with the parents or legal guardians of children in developing and operating programs that include and serve children. In addition, programs that receive assistance under the national service laws must, before transporting minor children, provide the children’s parents or legal guardians with the reason for the transportation and obtain the parent’s or legal guardian’s permission for such transportation, consistent with State law.

Description of Activities – Please describe the curriculum or strategy that will be used to guide students through structured, supervised, high-quality service-learning. What types of service might the youth undertake? How will reflection reinforce learning objectives?

Describe your plans and your capacity (current and anticipated) to implement and use self-assessments and continuous improvement systems to provide data and information on the success of this project.

Ability to Provide Fiscal Oversight. Describe the demonstrated experience and infrastructure your organization has in managing grants. What is your current organizational budget and what percentage of the budget would this grant represent? How will you ensure compliance with Federal requirements?

3. Cost-Effectiveness and Budget Adequacy

Explain how the proposed program budget aligns with the program's stated goals and structure. How will program funds be used and how will the program ensure that non grant-funded resources are secured to support program success?

4. Clarification Summary

After signing off on the Authorization, Assurances, and Certifications, his/her name will override any previous signatory and show on the application as the Authorized Representative.

Failure to respond to requests for information in a timely fashion will result in the removal of applications from consideration. Applicants should be prepared to provide documentation of partnerships and other support described in the narrative such as Memoranda of Understanding, samples of selected curriculum, organization annual reports, and evaluations.

V. Application Review Information

What is the selection process and criteria for these grants?

In evaluating applications for funding, reviewers will assess program design, organizational capacity, and cost-effectiveness and budget adequacy. The weights assigned to each category are listed in the chart below. Reviewers will assess application narratives against these criteria and the extent to which the applicant responds to the questions in this Notice. Please read this guidance carefully to ensure that you are fully and appropriately responding to the information requested in the application.

Basic Selection Criteria: Categories and Respective Weights

Category	Percentage
Program Design	50%
Organizational Capability	40%
Cost-Effectiveness and Budget Adequacy	10%

Program Design

Program elements are widely adaptable to service opportunities that are suited to different regions, cultures, age groups, education levels, and issues. Program designs may vary, but all programs must involve, and will be evaluated in relation to, the following indicators of successful projects:

- **Meet real needs.** Service will be more meaningful to the students if their efforts are clearly directed at meeting real community needs. In addition, communities can benefit from student efforts, and young people will be viewed as a resource, rather than a problem, if they are seen as making an important contribution. For this competition, service activities should address environmental and/or disaster preparedness issues relevant to the community served.
- **Involve service-learning.** Service-learning combines service to the community with student learning in a way that benefits both the student and the community. Grantees are expected to make use of the [K-12 Service-Learning Standards for Quality Practice](#) to ensure positive participant impacts.
- **Provide opportunities for youth leadership.** The chance to practice leadership skills is an important learning experience that can prepare students to take initiative later in life.
- **Provide training and supervision.** Students must be prepared for their service to enable them both to tie the experience to learning and have the requisite knowledge and skills to perform assigned tasks. Programs must provide adequate supervision.
- **Involve problem solving.** Many service programs that have strong civic participation outcomes involve problem solving by students. A typical design engages students in identifying community needs and then guides them through a process that enables them to consider a range of possible responses.
- **Offer continuity and intensity.** Episodic volunteering has not been shown to have the strong benefits of service-learning that is either ongoing (for a few hours each week) or intensive over a shorter period of time (such as full-time for several weeks). An intense experience also helps young people form bonds with one another and enhances their ability to experience transformative change.
- **Encourage teamwork and skill building.** Most real-life problem solving involves teams, not individuals working in isolation. Teamwork skills are essential to later success, as are other skills that can be promoted through service, including communication, leadership, and work skills such as punctuality, diligence, appropriate dress and behavior.

Organizational Capacity

An applicant's organizational capacity will be evaluated based on the following characteristics/experience: Grants management, staff background, volunteer management, data collection, effective community collaboration, training and technical assistance, working with disadvantaged youth, and summer programming.

Budget Adequacy/Cost Effectiveness

Applications will be evaluated based on the extent to which they describe how federal funds will be expended in a way that maximizes resources and ensures program success.

VI. Award Administration Information

When will applicants be notified of awards?

We anticipate making awards by the end of March 2010. Applicants may be asked for clarification as part of the review process. Applicants must satisfactorily resolve any questions or issues identified during review.

What documents govern the grant?

Grant provisions are incorporated in the Notice of Grant Award (NGA). The NGA also includes the approved application as part of a binding commitment under the grant.

What are the reporting requirements for these grants?
