SUMMARY: The Department of Education (ED) is proposing to extend for three years the collection of information from the Corporation for National and Community Service (CNCS) regarding Civic Engagement and Volunteering. This collection of information is necessary to enable CNCS to perform its functions of CNCS, including whether the information will have practical utility; evaluate the accuracy of the agency’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; propose ways to enhance the quality, utility, and clarity of the information to be collected; and propose ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments

As discussed below, CNCS has revised its proposed instrument to incorporate a number of respondents’ comments. CNCS is currently considering a number of other comments that are not addressed below. CNCS published a Notice in the Federal Register on February 8, 2017, FR Doc. 2017–02527—Vol. 82, No. 25, pp. 9726–9727, inviting public comment on our plans to submit this request. We received six requests for additional information and sixteen comments in response to the Notice. All letters and comments are listed in the attached doc. In summary, of the sixteen comments, 14 raised concerns regarding proposed changes to the volunteer questions. Many of the comments were from volunteer commissions and organizations that represent multiple users.

Primarily the respondents objected to a reduction in the number of questions regarding volunteer activity (organization types, activity types). Four respondents commented on the reduced capacity to track longitudinal rates and possible changes in the volunteer rate over the previous 14 year period. Fifteen respondents indicated that the previous instrument should be re-instated.

In considering these comments CNCS offers the following response. The re-designed supplement is intended to focus on the broader concept of civic engagement, of which volunteerism is one component. The re-designed supplement incorporates many of the recommendations made by the National Academy of Sciences, as well as recommendations made by experts in the field of civic engagement, social capital and volunteering. The Civic Engagement and Volunteer supplement more accurately reflects the mission of the CNCS, building stronger communities and promoting active citizenship through service. The proposed instrument does include some measures that will allow for limited continuity with the previous supplement, however the advantage of a combined supplement is that it will allow the user to assess overall civic activity conditioned by volunteering.

However in response to the comments requesting greater continuity and because the time burden on the new supplement is shorter, CNCS is adding back some original questions regarding volunteer activity and organizations.
