

## Foster Grandparent Program

### National Performance Measures Frequently Asked Questions

1. How long does a project have to graduate volunteers and stations that are not part of the new Performance Measures?

**Answer:** Projects awarded under the new Performance Measures should only support activity that is in alignment with the new Performance Measures as described in the awarded grant application. All volunteers and stations in the Senior Corps project should be serving according to the Performance Measure work plans described in the awarded application. Grantees should be working on work plan targets that are set to be achieved in the third year of the grant. However, this does not mean that grantees have three years to graduate stations and volunteers.
