

September 11th National Day of Service and Remembrance

The Edward M. Kennedy Serve America Act designated September 11th as a National Day of Service and Remembrance and made the Corporation for National and Community Service (CNCS) responsible for advancing September 11th service and remembrance activities. The purpose of this grant competition is to increase participation in this day of service and remembrance and to have those grants align with the strategic focus areas important to CNCS. This competition is for two years of funding, with the second year contingent on performance in the first year and availability of funds for the 2013 activities.

Organizations could either choose to implement projects directly or sub-grant to eligible organizations. Projects could either be statewide, regional, or national in scope. National in scope is defined as 10 or more locations across the country.

Competition Structure and Competitiveness:

We received 52 applications (\$5,242,330 in federal requests). Forty-nine (49) were deemed eligible for review.

The following documents are available:

- List of compliant applications submitted to CNCS.
- Executive summaries of all compliant applications
- The 424 facesheet and program narrative for the successful applications.
