

## Nonprofit Subgrantees in Montana

Program HQ Location	Nonprofit Subgrantee Name	Description
	<i>Intermediary</i>	
Butte, MT	Butte Community Health Center The John Hartford Foundation	<p>The John A. Hartford Foundation plans to disseminate the IMPACT model of depression treatment through community health clinics as subgrantees to serve low-income, rural communities in Wyoming, Washington, Alaska, Montana, and Idaho. The IMPACT model is a collaborative care approach in which a primary care provider (PCP) and care manager team, along with a psychiatric consultant, provide treatment for depression. The care managers and PCPs retain primary responsibility for treatment and receive advice from the psychiatric consultant when patients are not improving. The key anticipated outcomes for the SIF IMPACT evaluation include the following: 1) Increased access to effective depression treatment for low-income patients in rural areas; 2) Decreased depression and improved social and occupational functioning among these patients; and 3) Improved economic well-being of individuals and families served including: a) Reduction of costs related to health care expenditures; b) Improvements in employment and related income; and c) Reduction in care-related costs for depression that are borne by family members.</p>

## Nonprofit Subgrantees in Montana

Program HQ Location	Nonprofit Subgrantee Name <i>Intermediary</i>	Description
Missoula, MT	Community Supervision Alternatives University of Utah Policy Innovation Lab	Community Supervision Alternatives (CSA) is a Missoula, Montana based nonprofit that was founded in 2011 as a cost-effective provider of community supervision and monitoring services for criminal offenders experiencing drug and alcohol dependency. CSA provides comprehensive supervision, advanced electronic monitoring, drug testing, and rehabilitative services as an alternative means to incarceration, enhancing the lives of offenders through treatment and dynamic community-based services. CSA works with both charged and convicted offenders, as well as individuals before entering the judicial system.
Missoula, MT	Missoula County, MT and Montana State Department of Corrections University of Utah Policy Innovation Lab	Missoula County, Montana is developing a feasibility study to explore the possibility of using a Pay for Success approach to alleviate factors contributing to jail overcrowding. Officials seek to reduce overcrowding of the jail's 394 adults and 24 juvenile beds through diversion programs for non-dangerous offenders and by decreasing or eliminating inappropriate incarceration.
